Revenue by Category

Revenue by Month

KEY INSIGHT:

- Main Dishes contribute nearly **47%** of total revenue, making them the primary revenue driver. It generate almost **3×** the revenue of Starters.
- Revenue remains stable throughout the year, with **limited year-over-year growth between 2022 and 2023**.

Recommendation:

- Bundle **Main Dishes with Drinks or Side Dishes** to increase Average Order Value.
- Also, **review and optimize drink pricing** or introduce premium beverage options to improve revenue from the lowest-performing category.
- To drive future revenue growth, focus on **monthly promotional campaigns, seasonal menu launches, and limited-time offers** instead of relying only on natural demand.

Customer Behavior Analysis

Top 10 Customers by Revenue

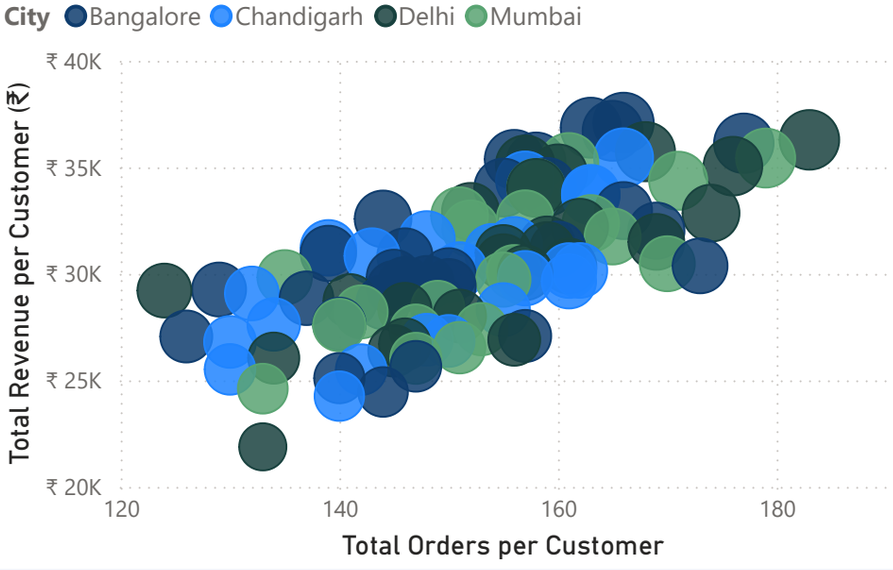

Insight:
The restaurant has a **diversified customer base** and is **not dependent on just 2–3 customers**. Revenue is well distributed across customers, reducing customer concentration risk and ensuring stable business

Recommendation:
The restaurant can implement loyalty programs, reward frequent customers, and encourage repeat visits to increase customer lifetime value.

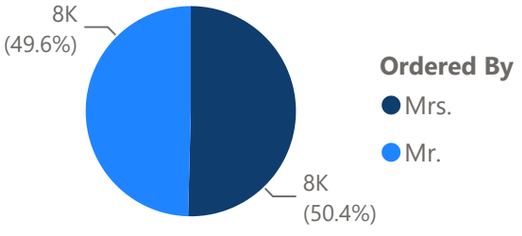

Customer Id	City	Age Group	Total Revenue (₹)	Total Orders
CUST_093	Bangalore	18-25	₹ 37,090	166
CUST_020	Bangalore	46+	₹ 36,860	163

Customer Segmentation Analysis

Insight:
The scatter plot reveals a **positive correlation** between total orders and customer revenue, indicating that customers with higher purchase frequency generally generate greater revenue. This reflects a healthy and consistent purchasing pattern across the customer base.

Order Distribution by Gender

Insight: Gender contribution is nearly equal, with Mr. accounting for 50.4% and Mrs. for 49.6% of total orders. Marketing campaigns can be targeted equally toward both customer segments.

Sales Trends & Performance

Revenue Contribution by Top 15 Items

Insight & Recommendation: The top-selling items (Grilled Chicken, Pasta Alfredo, and Steak) contribute over **30% of total revenue**. So, continue promoting them while reviewing the pricing, placement, and menu visibility of lower-performing items to improve their contribution and achieve a more balanced product mix.

Total Revenue (₹) by Day Name

Insight & Recommendation: Wednesday records the lowest revenue (₹4.23L), indicating a mid-week demand dip. **Introducing special Wednesday offers, combo deals, or discounts** can help attract more customers, increase footfall, and improve sales on the weakest-performing day.

Total Revenue (₹) by City

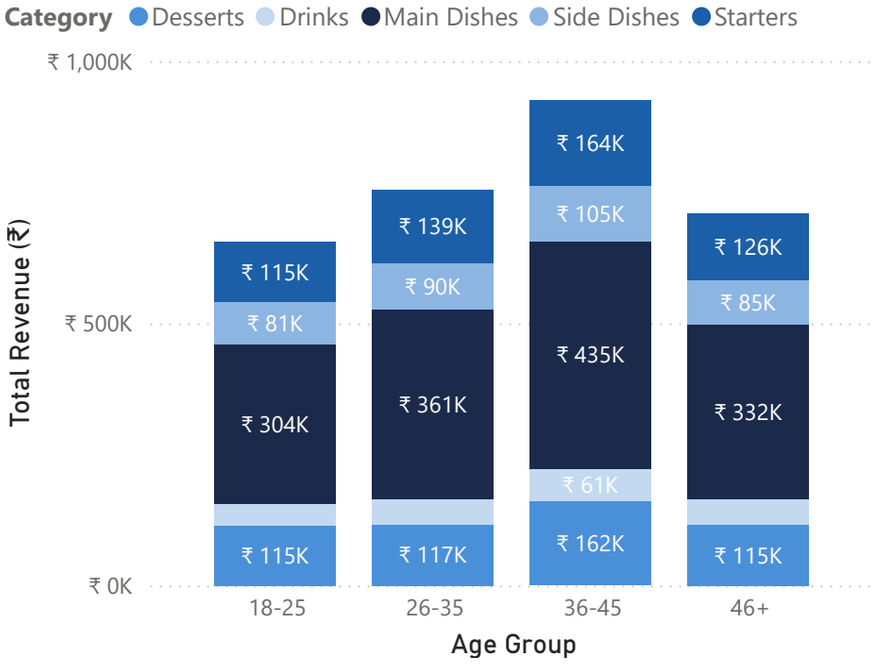

INSIGHT:
Bangalore generates the highest revenue (₹9.57L), while **Mumbai** records the lowest. This indicates varying market performance across cities and highlights opportunities to improve sales in lower-performing locations.

Geographic Revenue Distribution

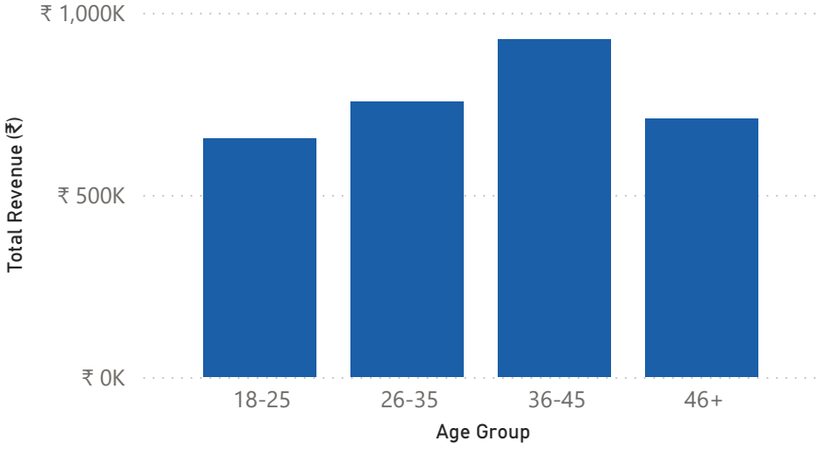

Age Group Revenue Analysis

Total Revenue (₹) by Age Group and Category

Total Revenue (₹) by Age Group

Recommendations:

- The **18–25** age group presents a **growth opportunity.** The restaurant can attract younger customers by creating a more **modern and aesthetically appealing ambience** with Instagram-worthy interiors and photo-friendly spaces, supported by active **social media marketing.**
- Introduce student **combo meals, cashback offers, happy-hour discounts, and payment-based promotions** to encourage more visits and increase spending among younger customers while maintaining engagement with high-value customers aged 36–45.

Insights:

- **Main Dishes** continue being the **highest revenue-generating** category across all age groups, indicating a consistent menu preference **regardless of customer age**.
- Customers aged **36–45** contribute the **highest revenue**, while customers aged **18–25** contribute the **least**. This indicates that the restaurant currently attracts more working professionals than younger customers.
